JAIGANESH

Full Stack Developer | Java | JSP | React.js | JavaScript | SQL | REST APIs

Chennai, India | 9080230816 | ganeshjai1326@gmail.com | Portfolio: jaiganesh2613.github.io

LinkedIn: linkedin.com/in/jaiganesh26 | GitHub: github.com/Jaiganesh2613/MyDevelopment

PROFESSIONAL SUMMARY

Full Stack Developer with 2.9 years of experience building and supporting Java and JSP web applications and RESTful APIs in production, with frontend development in React.js and JavaScript. Strong SQL skills across SQL Server and MySQL, plus JWT-based security and Redis caching. Working knowledge of Spring Boot and NestJS backend flow, with exposure to payment gateway integration and Python backend development. Uses AI tools such as Cursor and Claude to speed up development, debugging, and testing. Experienced in Agile/Scrum teams.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, JSP, HTML5, CSS3, Python (exposure)

Frontend: React.js, JavaScript, JSP, HTML5, CSS3, Responsive Web Design

Backend & Architecture: Java, JSP, RESTful APIs, MVC Architecture, Microservices, Spring Boot (working knowledge), NestJS (backend flow knowledge), Payment Gateway Integration (exposure)

Databases: SQL Server, MySQL, Redis (caching), Stored Procedures, Query Optimization

Security: JWT Authentication & Authorization

AI Tools: Cursor, Claude (AI-assisted coding, debugging, and testing)

Cloud & DevOps: AWS (CloudWatch, S3), Git, Docker (familiar with containerization workflow)

Testing & Tools: Postman (API Testing), Nightwatch.js (Automation Testing)

Messaging: Apache Kafka (conceptual knowledge)

Practices: Agile/Scrum, Production Support, Debugging, Performance Tuning, Asynchronous Programming, Error Handling

PROFESSIONAL EXPERIENCE

Software Developer | Thapovan Info Systems **Dec 2023 – Sep 2026**

- Designed, developed, and maintained Java and JSP-based RESTful APIs and backend services for production business applications.
- Developed web application features across frontend and backend using Java, JSP, JavaScript, React.js, and SQL.
- Debugged and resolved issues across MVC and microservices-based applications, delivering continuous backend enhancements.
- Optimized MySQL and SQL Server queries and database schemas to improve performance and reliability.
- Monitored AWS production environments and analyzed CloudWatch logs to troubleshoot incidents and improve uptime.
- Validated service integrations through API testing in Postman, reducing defects before release.
- Used AI tools such as Cursor and Claude to accelerate coding, debugging, and test creation.
- Contributed to requirement analysis and design discussions in Agile/Scrum sprints.

Java Developer Intern | Thapovan Info Systems **3 Months**

- Built and tested RESTful APIs and backend modules in Java for enterprise applications.
- Collaborated with the team on the software development lifecycle, code reviews, and coding best practices.

PROJECTS

Paltalk | Java, JSP, JavaScript, React.js, SQL Server, Redis, JWT, Nightwatch.js

- Developed and maintained backend APIs for Paltalk web and desktop applications within a microservices architecture.
- Developed application features using Java, JSP, JavaScript, React.js, and SQL across frontend and backend.
- Implemented JWT-based authentication and authorization to secure REST API endpoints across web and desktop clients.
- Configured Redis caching to improve application response time and scalability.
- Managed SQL Server operations, including query handling and stored procedure support.
- Automated regression tests with Nightwatch.js, increasing test coverage and reducing manual QA effort.
- Gained exposure to Kafka-based asynchronous messaging used within the platform architecture.
- Resolved reported bugs, improving application stability and backend performance.

Unified Payment System | React.js, NestJS (backend flow exposure)

- Contributed frontend development in React.js for the Unified Payment System, a single payment gateway application supporting payment workflows across the platform.
- Gained working knowledge of the NestJS backend flow, including API structure and request handling behind the payment gateway.
- Gained exposure to JWT authentication used to secure payment gateway APIs and protect sensitive transaction data.
- Gained exposure to payment gateway integration through the Cleverbridge gateway.

Rollingstone (Maatrum) | React.js, Python (exposure), Cursor

- Contributed to Maatrum, a document extraction system that identifies and displays required fields from documents for users.
- Built frontend components using React.js to display extracted document fields and support UI requirements.
- Gained hands-on exposure to Python backend development, using Cursor for AI-assisted coding, debugging, and iteration.
- Acquired working knowledge of document extraction concepts, training datasets, and the overall project workflow.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering **2017 – 2021**

Vels Institute of Science, Technology and Advanced Studies (VISTAS)

CERTIFICATIONS

- Core Java – 6-Month Course Completion, Softlogic Systems
- SQL – 2-Month Course Completion, Greens Technology
